Thanks John.
We'll make sure Shawn sees this if he's not seen it already.
Mike

Shawn - Wanted you to be aware that we've provided this info to ORD who will be providing it to Chesapeake this afternoon at 1pm. We've also provided the same information to Rich Fetzer for Cabot. Let me know if you have any questions or concerns. Thanks, John

Jeanne briefed Bob this morning, and he concurred that we would provide to Chesapeake the following information, in response to their request for lab procedures for glycol analysis, as part of ORD's proposed Prospective Case Study, which is part of their overall HF Study:

OASQA Quality Manual
Relevant administrative SOPs
Summary information on the glycol analysis
Copy of case file notes from the glycol analysis performed for the Pavilion investigation (posted on Region 8 website)

Carob has requested information on methods being performed for the Dimock investigation. Per their request, we are providing the following to Rich Fetzer, to be forwarded to Cabot:

OASQA Quality Manual
Summary of methods identified in the Sampling Plan
Summary information on the glycol analysis
Method SOPs

Please let us know if you have any questions.

He's fine w/ us giving out the info on the glycol ether method, and the lab procedures (equivalent to the ORD PPM 13.4 that you reviewed). He understands it is the same info as applies to all 3 locations. So I'm planning to do that today at 1 pm unless I hear differently from you.

thanks!

Jeanne
